

Flat Reflective Ceiling Clouds

Flat Reflective Ceiling Clouds are designed for places where audio and comprehension are critical during a performance, as well as maintaining a strong design element. They give you the ability to put sound in to the hard to reach areas of an auditorium or theater, allowing audio engineers to really let the performers stand out not only to those in the front, but everyone in the back.

Product features

Core construction:

Flat panel is an MDO (Medium Density Overlay) plywood, sometimes backed with dimensionally-stable 6-7 PCF fiberglass board.

Size availability	Edge details	Finishes	Mounting	Shapes
<ul style="list-style-type: none"> Thicknesses: 3/4" Standard max: Widths: 4' Lengths: 8' <p>Custom size is our standard.</p>	<ul style="list-style-type: none"> Standard edges are square and bevel. Edges can be built up to hide mounting hardware. 	<p>A wide variety of fabrics are available from all major brands, including:</p> <ul style="list-style-type: none"> Carnegie Maharam Designtex Knoll Guilford of Maine 	<p>Reflector hardware is standard for flat reflectors.</p>	<p>—</p>

Acoustic performance

The NRC of the products are determined from an average of sound absorption coefficients, obtained from tests conducted according to ASTM C423 procedures in an NVLAP accredited laboratory.

3/4" thickness	1/A (ASTM E84)	—	—	—	—	3 years (from date of shipment received)

Initiatives

Sustainability

Conwed is committed to driving sustainability wherever possible. By streamlining our processes and using recycled materials in our products, we strive to decrease our environmental impact. Our materials are certified by leading social responsibility groups and are helping us pave the way toward a more sustainable future.

For your LEED® projects, our products can help you qualify for different points depending on the product you choose. Contact us to learn more detailed information.
