

Foundations Baffles: Solid Core

Foundations Baffles are designed for areas requiring excellent sound absorption with a "soft drywall" look. Panels are also able to be field painted for added flexibility. Use in conference rooms, auditoriums, churches, entryways, etc.

Product features

Core construction:

Dimensionally-stable 6-7 PCF fiberglass board, covered with a specially-formulated fiberglass scrim. The acoustically transparent finish completely covers the face and exposed edges. Edges are protected with a resin hardening.

Size availability	Edge details	Finishes	Mounting	Shapes
<ul style="list-style-type: none"> Thicknesses: 1 1/2", 2" Standard max: 4'x10' 	All edges are resin hardened, unless otherwise specified. Available choices include: <ul style="list-style-type: none"> Square 	Factory-finished with a proprietary white, acoustically transparent covering with a "soft drywall" look. Finish can be as-is, or field painted with a spray application.	Standard mountings: <ul style="list-style-type: none"> Acoustical spring anchor 	—

Custom size is our standard.

Acoustic performance

The sabins of the products are determined from an average of sound absorption coefficients, obtained from tests conducted according to ASTM C423 procedures in an NVLAP accredited laboratory.

	HZ →	125	250	500	1000	2000	4000	SABINS ↓
