

Respond® HI Direct-Attach Wall Panels

Respond® HI Direct-Attach Wall Panels are designed for use in high-abuse areas requiring sound absorption. A vast variety of fabric finish options, from the leading fabric suppliers, offer you great design customization. A sheet of perforated copolymer under the fabric allows sound absorption while also giving you high impact resistance to withstand many forms of punishment. Use in gymnasiums, hotels, fitness centers, multi-purpose rooms: anywhere requiring a durable acoustic panel.

Product name history: Respond® HI was previously known as Rebound. This name change occurred on 03/16/2020.

Product features

Core construction:

Dimensionally-stable 6-7 PCF fiberglass board, with a layer of 1/16" resilient perforated copolymer, covered with custom fabric that is completely adhered to the face of the panel and returned to the back for a full finished edge. All corners are fully tailored. Edges are protected with resin hardening.

Acoustic performance

The NRC of the products are determined from an average of sound absorption coefficients, obtained from tests conducted according to ASTM C423 procedures in an NVLAP accredited laboratory.
