Nanotechnology Stain Resistant Finish

A stain resistant finish that, thanks to the light-weight nature of nanotechnology, preserves a fabric's feel. The finish also allows any bleach-treatable fabric to remain bleach cleanable.

Cleaning Codes

WS Clean only with water-based or solvent-based cleaner. Do not saturate.

For regular maintenance of coated fabrics, always rinse the cleaned and/or disinfected area(s) with fresh water. Wipe dry and repeat if necessary.

Bleach and Disinfectant Compatibility

All products have been tested with bleach (sodium hypochlorite) and a variety of disinfectants (isopropyl alcohol, quaternary ammonium and peroxide-based). Scan the QR code below for approved disinfectants by product.

Abrasion

Abrasion has been tested with the Wyzenbeek method using either cotton duck (CD) or wire screen (WS) as the abradant, or the Martindale method using worsted wool as the abradant. ACT guidelines require at least 30,000 Wyzenbeek double rubs or 40,000 Martindale cycles for woven upholsteries, or 50,000 Wyzenbeek double rubs for coated upholsteries in heavy duty single-shift application. Multiple factors affect fabric durability and appearance retention, including end-user application and proper maintenance. Abrasion test results exceeding ACT Performance Guidelines are not an indicator of product lifespan.
